Curriculum Vitae of Failures

This CV of Failures is an attempt to balance the record of successes and failures and provide some perspective when we only see the celebrations of success. This idea is not mine, but due to an article in Nature by Melanie I. Stefan. You can find the original article [here](#). Find other examples of academics CV of failures [here](#), [here](#), and [here](#).

This CV is unlikely to be complete and years may not be 100% accurate– much of it was written from memory and probably omits a lot of stuff!
